**Re:** January Maintenance Report

**1.General Village Maintenance:** The sander was installed on the Ford and tested. I ordered a battery tender. The batteries were removed from the woodchipper, hydraulic compressor and roller for the winter. The roller battery needed to be replaced due to it being 10 years old and not holding a charge anymore. There were 2 snow events, the first one we only needed to sand/salt the roads. The second event was larger, we plowed and sanded/salted the roads then plowed the sidewalks and cleaned the driveway aprons. Calcium was put down on the sidewalk due to the cold temperatures. All vehicles were power washed and desalinated after the events to neutralize the salt used. I completed the village sign and installed it on Melbourne Roads entrance. We replaced the sign and post on the corner of Carlton Road and Clent Road, which was knocked over. The street sweeper went out after each snow event to clean the sand that was put down.
